Hello, Sun Devil community!

We are back in more ways than ever! With this fall semester, the doors to our classrooms spring wide open! Once again, the familiar sounds, sights, and energy of live OLLI experiences beckon us to the joy of face-to-face encounters with world-class faculty. We are back to our good old familiar places — ASU West, ASU Downtown Phoenix, and Tempe Connections.

And, there is more. Your OLLI at ASU now has a new intellectual hub at the sparkling new ASU-Mayo Health Futures Center adjacent to the Mayo Phoenix campus. The Health Futures Center is a crucible for medical breakthroughs, where ASU and Mayo scientists work side-by-side at the cutting edges of science for the advancement of human life quality. As our programming grows there, we will be emphasizing breakthroughs in medicine, and, holistically, all things that propel us to thrive — physically, mentally, and spiritually. We are eager to share all that is known about the relationships among health, longevity, human connectivity, curiosity-seeking, and living out lives of purpose.

During the past six months, we have been developing more structure and more pathways for our members to be centrally involved in shaping the very character and essence of OLLI at ASU. Our new Leadership Council, chaired by member Dr. Wendy Hultsman, is spearheading the development of an OLLI at ASU strategic plan that will solidify the vision you wish to have for your OLLI at ASU. New committees are being formed, centering on six areas of emphasis: Innovation, Community Connections, Member Engagement, Membership Growth, Financial Resources, and Organizational Structure. Your voice — and your ideas — are critical. As the semester progresses, look for many ways to become involved — and to grow with others in the pursuit of excellence.

I also wish to express deep gratitude for how you rallied around OLLI at ASU during our annual giving campaign this past academic year. Over $44,000 was raised, with one in seven members participating. As was true last year, your donations guaranteed the very survival of OLLI at ASU through the pandemic, and your financial support has never been more important than during this time of change. Every dollar is important and stewarded for the benefit of all. In addition to your continuing gifts, please consider joining 27 of your fellow members in the OLLI at ASU Leadership Society, a society dedicated to help your OLLI at ASU community catapult itself into yet unimagined ways to help us all achieve yet unimagined destinies in our own lives.

Finally, and yet importantly, we welcome two very gifted staff to our OLLI at ASU family — Strength-Pickering and Nate Sawyer. They are master scholars and community builders who will help us all blossom as they carry out their duties of program design and hospitality on behalf of all of us. And, the same is true for the ever-favorite Jolene Gosling, the sparkplug for our wonderful site at Tempe Connections. Importantly, we can’t help but give a tip of the hat to Nora Mandel, our beloved North Scottsdale program coordinator. All of the success that you have enjoyed at our Scottsdale site over many, many years is a direct result of her love for OLLI, and for you. Please find ways to express your gratitude to Nora as she moves into retirement with a lasting legacy.

We will see you very soon in the classrooms and online! Let’s fuel our curiosities together and search out opportunities not only to understand our world, but discover new ways to thrive and serve within it!

Keep Learning! Keep Growing! Keep Serving!

Looking for a Saturday class? See page 12 for details!
Monday

001 | Don’t Take a Trip: Balance, Hearing & Your Health
Instructor: Dr. Erica Williams  Cost $14
1 session: Monday, Sept. 12
9:30 – 11:00 a.m. | ASU West campus

Falls are a leading cause of injury in older adults and also carry a significant financial impact within our healthcare system. Likewise, the likelihood of hearing loss increases as we age. Join us for this class where you will learn how your body maintains balance, the role that the inner ear plays, and how the auditory system functions and interacts with balance. Rehabilitative strategies for hearing and balance will also be discussed.

002 | Understanding the U.S. Federal Budget
Instructor: Dr. Jon Haveman  Cost $14
1 session: Monday, Sept. 12
10:30 a.m. – noon | Zoom

The U.S. federal government is the largest reporting entity in the world. However, the budgetary and accounting processes of this massive entity are largely unknown by its funders (taxpayers). The federal government is unique in that its revenues (tax inflows) are independent of its services, and its effectiveness and efficiency are not measured by profits. This presentation helps stakeholders acquire a common base knowledge and thus view the federal budget through an informed lens.

003 | Just Say It!
Instructor: Marcie Lee  Cost $14
1 session: Monday, Sept. 12
10:30 a.m. – noon | Zoom

There is no frightening feeling you cannot confront in yourself and articulate to another person once you have learned the words, voice, and body language that deescalates conflict and amplifies self-esteem. Armed with these, the choice to express what you feel or not, is all yours. Experience your power to transform your words and the power of words to transform relationships. You are encouraged to bring to class at least one brief but powerful thing, wholly unedited, you wish you could say to someone. Leave knowing how to fine tune it so you can… JUST SAY IT! There will be class conversation, texts to study, and art to observe.

Tuesday

004 | Jewish Refugees of the Caribbean
Instructor: Dr. Stanley Mirvis  Cost $14
1 session: Monday, Sept. 12
1:00 – 2:30 p.m. | Zoom

In 1938 more than 30,000 German-speaking Jews fled from Nazi antisemitism. With the doors to America and Palestine closed, many looked toward South America and the Caribbean — places with loose visa requirements — for refuge. This presentation focuses on the German Jewish refugees who found haven in Cuba, the Dominican Republic, Jamaica, and Trinidad. It explores both the governmental and social responses to the Jewish refugee crisis.

005 | The Evidence for Evolution
Instructor: Dr. Kjir Hendrickson  Cost $28
2 sessions: Tuesdays, Sept. 13, 20
10:00 – 11:30 a.m. | ASU Downtown campus

How can we be sure humans evolved from a branch of the great apes? If we evolved from apes, why are there still apes? How does one species give rise to another? Is evolution still happening? What is the “theory of evolution by natural selection,” where did it come from, and how sure are scientists about it? In this class, we will look at the evidence scientists use to understand evolution, speciation, and the variety of life. In addition to examining ancient evolution, we will explore some of the ways in which humans have continued to evolve since taking our modern form, all as part of the fascinating story of how life came to be on our planet as it is today.

006 | Everybody Dies: Funeral Planning Rights & Options
Instructor: Martha Lundgren  Cost $14
1 session: Tuesday, Sept. 13
10:00 – 11:30 a.m. | Zoom

The death of a loved one is never easy. Arranging affordable, dignified, meaningful after-death care shouldn’t add additional burdens to your life. This class will cover consumer rights in arranging for cremation, burial, or other options that may not have been considered. After this class, you will be adequately prepared to make well-informed, financially-sound, after-death decisions for yourself or a loved one.

007 | Does Religion Cause Conflict?
Instructor: Dr. John Carlson  Cost $14
1 session: Tuesday, Sept. 13
1:00 – 2:30 p.m. | Tempe Connections (Public Library)

We have been taught not to mix religion and politics. But much depends on what we mean by “religion” and what attitudes about religion we bring with us to the table. In this class, we will discuss religion’s relationship to violence and conflict and why we often try to keep religion out of politics. We will also consider whether and how religion is related to justice and peace and what role it can and should play in democracy.
Food & Memory: Is There a Connection?
Instructor: Dr. Rick Hall  
Cost $14
1 session: Wednesday, Sept. 14  
9:00 – 10:30 a.m. | ASU West campus

Much of what we hear about the interplay between diet and brain health is based on preliminary research and then flooded in hype. As headlines have linked one food or another to Alzheimer’s disease and other illnesses, we have rushed to remove them from our diets. The problem is, as soon as one headline urges one thing, another appears saying just the opposite. How much does nutrient status affect cognitive function? Join us in class as we explore this delicate balance!

Magic of Mindfulness
Instructor: Jamie Valderrama  
Cost $56
4 sessions: Wednesdays, Sept. 14, 21, 28, Oct. 5  
10:00 – 11:30 a.m. | ASU Downtown campus

Stress is increasingly gaining attention in the U.S. as well as around the world for the detrimental health effects it produces, while mindfulness is gaining attention worldwide with the emergence of promising data showing how the simple act of being aware can deregulate the body’s stress response — leading to a happier and healthier life. This four-part lecture series highlights the stress response physically and psychologically as well as applicable mindful practices to deregulate stressful triggers in our personal/professional lives.

The Positive Public Impact of Air Racing 1920–1940
Instructor: Michael Lavelle  
Cost $28
2 sessions: Wednesdays, Sept. 14, 21  
10:30 a.m. – noon | Zoom

Air racing played a critical role between the World Wars. Race promoters attracted large crowds with international media attention despite the economic Depression, resulting in benefits to aircraft manufacturers, engineers, pilots, and their aircraft. The major air races — the Bendix, Thompson, and Schneider events — were world famous and their first-place trophies were prized possessions. The presentation will also discuss the roles the Air Races played in advancing aircraft designs to go faster, further, and higher from 1920 to the beginning of World War II.

From the “Ten Commandments” to “The Truman Show”: Hollywood Film Music Composers From the 50s to the 90s
Instructor: Emanuel Abramovits  
Cost $56
11:00 a.m. – 12:30 p.m. | Zoom

Hollywood film's story is also a story of music. Learn from an expert how the top composers experience their struggles, secrets, and how they find their groove. With anecdotes, stories, & audiovisuals, we will explore the role of music in the perception of images through decades of changing tastes. We will relive our favourite westerns, action films, comedies, & romances through the scores of Elmer Bernstein (“The Magnificent Seven”), Jerry Goldsmith (“Alien”), Howard Shore (“Lord of the Rings”), & more.

Ukraine & Russia II: Where Are We and How Did We Get Here?
Instructor: Dr. Hilde Hoogenboom  
Cost $14
1 session: Wednesday, Sept. 14  
1:00 – 2:30 p.m. | Zoom

Russia shocked the world when Putin invaded Ukraine on Thursday, February 24, 2022. Few believed that Ukraine’s military would last a week. Europe is undergoing its most profound transformation since the end of the Soviet Union in 1991. The NATO alliance has been reaffirmed as Germany re-arms and Sweden and Finland join; Europe is ending 50 years of importing cheap oil, gas, and coal from Russia; and 6 million Ukrainians have been welcomed by Europe in its worst refugee crisis. This talk is a briefing on the war and sanctions thus far and the history of Ukraine and Russia’s relations.

Memoir Writing Workshop I
Instructor: Dr. Elizabeth McNeil  
Cost $56
4 sessions: Thursdays, Sept. 15, 22, 29, Oct. 6  
10:00 a.m. – noon | Zoom

Memoir writing can help us preserve the past, as well as affect how we imagine, seek, and encounter new experiences. In this class, you will read and do exercises from Brenda Miller and Suzanne Paola’s “Tell It Slant: Creating, Refining, and Publishing Creative Nonfiction,” Third Edition (McGraw Hill, 2019). Each week, you will also develop and submit a short memoir for us to discuss together in class. This workshop is for people at any level of writing experience.
015 | Desert Potpourri: Science In Your Backyard
Instructor: Dr. Kjir Hendrickson               Cost $56
4 sessions: Thursdays, Sept. 15, 22, 29, Oct. 6
1:00 – 2:30 p.m. | Tempe Connections (Public Library)

1 session: Thursday, Sept. 15
1:00 – 2:30 p.m. | ASU Health Futures Center

The 15th Amendment became part of the U.S. Constitution in 1870. It provides, Section 1. The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of race, color, or previous condition of servitude. Just as important it states, Section 2. The Congress shall have power to enforce this article by appropriate legislation. Along with the 13th and 14th Amendments, the 15th Amendment redefined the Constitution and America. The 15th Amendment was as much the product of Black Self-Determination as it was the Reconstruction Congress's impetus to create a better and more just America.

1 session: Monday, Sept. 19

Minimum wages are among the most controversial topics in economic policy. While the federal government establishes the national minimum wage, many state and local entities opt to impose even higher minimum wages in their jurisdictions. Economists are divided on the economic implications of a non-trivial increase in the minimum wage, a reflection of a large body of research that fails to establish a consensus among the experts. This presentation looks at what consensus there is in the profession, discuss the differences, and provide policy alternatives.

All are welcome (including orchestra conductors!).

Instructor: Dr. Stanley Mirvis  
Cost $14  
1 session: Wednesday, Sept. 21  
1:00 – 2:30 p.m. | Zoom

Jewish and Black relations in America are defined both by moments of cooperation and of conflict. In the early twentieth century, culminating in the Civil Rights movement of the 1960s, Jews and Blacks formed a cohesive political and social alliance. They similarly became culturally entangled, especially through music and performance. In the decades following the Civil Rights Movement this once powerful alliance has dramatically deteriorated. We will explore the arch of Jewish and Black relations in the U.S. from the colonial period until present day.

Luciano Pavarotti was an Italian operatic tenor, eventually becoming one of the most commercially successful tenors of all time. He gained worldwide fame for the quality of his tone and eventually established himself as one of the finest tenors of the 20th century, achieving the honorific title “King of the High Cs.” While his professional life was nothing if not a success, and his duets with Joan Sutherland legendary, his personal life was not as perfect. His former agent and publicity manager, Herbert Breslin, describes Pavarotti in his tell-all book as childish, obsessive, over-demanding, lecherous, and very, very rude. “The story of a very beautiful, simple, lovely guy who turned into a very determined, aggressive, and somewhat unhappy superstar.” Great tenors can also be divas...but this course will feature the best of Pavarotti — his earliest performances, rise to international fame, his many interviews, and his philanthropic efforts — in fact and in video.

069 | Reading the Bible with Ancient Jews & Christians
Instructor: Dr. Blake Hartung  
Cost $14
1 session: Monday, Oct. 24
10:30 a.m. – noon | Zoom

We will explore how different communities of Jews in antiquity, including the Jesus movement that eventually became “Christianity,” read and reimagined their shared sacred texts. Traditions of reading the Bible ultimately helped create the distinction between “Judaism” and “Christianity” as ancient communities debated major questions of interpretation, such as the identity of the Messiah, the function of the Torah, and the meaning of Temple sacrifices. Discover how numerous points of contact and continuity between ancient Jewish and Christian readings of the Bible can make it challenging for scholars to identify particular interpretations as “Jewish” or “Christian.”

Cost $56  
4 sessions: Mondays, Oct. 24, 31, Nov. 7, 14  
1:00 – 2:30 p.m. | Tempe Connections (Public Library)  
The development of the “atomic” (fission) bomb is one of the most fascinating scientific adventures in world history. In contrast to popular belief, it was an international effort pursued by countries both allied and adversarial. We address the basic nuclear physics and bomb physics to understand what lead to the Trinity test on July 16, 1945. We visit the 24 primary actors in the process and many in the supporting cast. Time restrictions allow only coverage of events from discovery of the atomic nucleus in 1911 to the Trinity test of the “Big Boy” plutonium bomb in New Mexico. The class is designed at the level of a college introductory course and is for adults without a formal science background.  

Tuesday  
071 | The Beauty & Grandeur of America: The Hudson River & Rocky Mountain Schools of Art  
Instructor: Allen Reamer  
Cost $28  
2 sessions: Tuesdays, Oct. 25, Nov. 1  
10:00 a.m. – noon | ASU Downtown campus  
In the early 1800’s, Americans became proud of their vast country. Painters responded by painting specific subject matter and specific composition, beginning with New York’s Hudson River and its valley, a style that became known as the Hudson River Valley School of Art. This style quickly grew in popularity, driving painters towards compositions farther and farther afield — from South America to Canada. Eventually painters traveled to the Southwest, painting with the same composition, but with a different subject matter — a style that became known as the Rocky Mountain School of Art. In this class we will discuss and view paintings and specific painters from both schools of art.  
072 | Exploring Contemporary Art  
Instructor: Dr. Deborah Robin  
Cost $56  
4 sessions: Tuesdays, Oct. 25, Nov. 1, 8, 15 (at museum)  
10:30 a.m. – noon | Zoom / Scottsdale Museum of Contemporary Art  
The term contemporary art is loosely used to refer to innovative art of the present day and relatively recent past. It can be challenging to appreciate because the methods, concepts, and subjects defy the boundaries of traditional art. During the first three weeks of the course, we will meet via Zoom to look at some of the most well-known, socially-engaged, and controversial contemporary artists. After hearing the artists’ stories and learning about their intentions, alongside close observation and conversation, you will find the art much more accessible and enjoyable. For the final session, we’ll meet at the Scottsdale Museum of Contemporary Art for an in-person guided tour. Please note: the first three sessions of this class are the same as Dr. Robin’s previously OLLI course “Contemporary Art You Will Actually Like.”  

Wednesday

11:00 a.m. – 12:30 p.m. | ASU West campus  
Have you ever been in a situation where you were unable to express yourself in Spanish and wished you had the vocabulary to do so? This class will give you additional practice in what to say as a greeting in various situations when communicating in public. You will learn correct pronunciation in Spanish with the author’s “Phonetic Transcription” technique, which uses the letters of the English alphabet to give you a visual image of what each word sounds like. Join us for four weeks of practical language learning!  
074 | Jazz & Culture  
Instructor: Dr. Andrew Barnes  
Cost $56  
4 sessions: Thursdays, Oct. 27, Nov. 3, 10, 17  
10:00 – 11:30 a.m. | ASU West campus  
In this class, you will learn about jazz not as an art form but as a cultural experience for the people who liked listening to it. Americans, and then people around the world, got addicted to the musicality and virtuosity of jazz performers. The class tells the story of how — over the course of the 20th century thanks to technological innovations like the radio and the record player — jazz went from a street music to a dance music to a listening music. People listen for different things in different eras, so the course will run down the different styles of jazz that attracted listeners over the century.  
075 | Memoir Writing Workshop II  
Instructor: Dr. Elizabeth McNeil  
Cost $56  
4 sessions: Thursdays, Oct. 27, Nov. 3, 10, 17  
10:00 a.m. – noon | Zoom  
Memoir writing can help us preserve the past as well as affect how we imagine, seek, and encounter new experiences. In this class, you will read and do exercises from Brenda Miller and Suzanne Paola’s “Tell It Slant: Creating, Refining, and Publishing Creative Nonfiction,” Third Edition (McGraw Hill, 2019). (These chapters will be distinct from those covered in the earlier fall 2022 Memoir I workshop.) Each week, you will also develop and submit a short memoir for us to discuss together in class. This workshop is for people at any level of writing experience. Enrollment in Memoir I is not a prerequisite for this course.
The United States Supreme Court decided many important, controversial cases during its recent 2020-21 term ending last July. We'll discuss the factual and procedural backgrounds, surrounding legal contexts, holdings, and possible implications of many of those decisions, as well as what occurred during the term generally. We’ll also discuss the Supreme Court’s role in the United States judicial system, its justices, how the court chooses the cases it decides, and how its decision-making procedures operate. Background materials will be provided electronically for review prior to each class session.

The European musical traditions dominated America through the 18th and 19th centuries and even into the 20th. America, though, was developing its own musical voice in orchestral, choral, jazz, and chamber music. This survey of works by three of our own greats will take you on an unexpected and entertaining journey through their lives and compositions. We’ll move beyond the most famous pieces and hear some that deserve to be featured more often. The three composers helped drive music beyond its historical roots into something that is truly American.

Multiple programs have been proposed to help stop global warming. Several are based in space and have significant impacts on our atmosphere. The largest effect could come from Space Solar Power which comprises a constellation of large satellites in a high Earth orbit, where the sun is visible almost 100% of the time, collecting solar power and beaming it to fixed points on the Earth. Its main attribute is the ability to deliver clean, baseload energy, day and night throughout the year and in all weather. Recent technology and conceptual advances have made the concept both viable and economically competitive.

When migrants resettle in areas with established populations, tensions can rapidly escalate as groups with distinct cultural traditions learn to live together. What can the past tell us about how people alleviated these tensions to form lasting communities that included people from multiple ethnic backgrounds? One example is the fourteenth century Salado Communities. As migrants from the north settled in the Mimbres and Hohokam archaeological culture areas, the multiethnic communities used new religious practices to unite a diverse population. This class covers research on Salado communities from the last 20 years with additional insights from ongoing fieldwork in southwest New Mexico.

There is unprecedented consensus in the scientific community that our planet is warming as a direct result of human activity, but how have scientists come to that understanding, and what does it mean for us? Exactly what does the science show regarding global climate trends, how is global climate change already impacting the planet, and what does the coming century hold? What of questions regarding inaccurate past climate predictions, climate “skeptics,” or the potential for life to adapt to change? This course will address many aspects of reality of global climate change from a non-technical perspective.

In this course, we will focus on the works of Ada Limón and Ross Gay to see how their poetry steeps in nature and gardening to uncover insights and approaches to surviving grief and celebrating life. Generative writing portals will guide us to blend suffering and joy in our own poetry and narratives.

The imperative to never forget, a look at how we make it real. We will look at words and stories — including first person testimonies, letters, other written records, historical research, and resources, both print and virtual.

There is consistency and chaos constantly swirling around the unchanging reality that human beings are sexual beings every day of their lives. Whether we understand or are bewildered by our sexual selves, and whether we hide or reveal our sexuality, we are subject to powerful forces shaping our physicality, our psyches, and our politics around sexuality and sex. In this class, we will explore artistic portrayals of sex and sexuality in the context of exponential changes in the science of what it means to be who we are.

Instructor: Dr. Sarah Bolmarcich
1 session: Tuesday, Nov. 22

How did those with blindness, deafness, mental impairment, or mobility impairments fare in the ancient world? For instance, did the Spartans kill disabled children at birth? Was “normal” life completely inaccessible to someone with a disability? Instructor: Doug Bradley
3 sessions: Tuesdays, Nov. 29, Dec. 6, 13

Vets’ testimonies tap into memories — individual and cultural — that capture a central, if overlooked, component of the American war in Vietnam. Rolling Stone named “We Gotta Get Out of This Place,” the book upon which the course is based, the Best Music Book of 2015. (This class continues in Spring 2023.)

Instructor: Dr. Cristiane Smith  
Cost $28  
2 sessions: Thursdays, Dec. 1, 8  
2:00 – 3:30 p.m. | Zoom

The history of Shakespeare and the visual arts dates back from contemporary images of the playwright such as the famous Chandos portrait (1610) and the Droeshout engraving in the cover of the First Folio (1623). The fascination for the “real” face of Shakespeare spurred a market of portraits that claimed to be “authentic” representations. The 18th and 19th centuries, especially, witnessed a boom in Shakespeare-related visual arts. Iconography was one of the most creative art forms through which England expressed their adoration for “the supreme poet”. This class will look at the growing popularity of visual depictions of the poet’s portraits as well as his works, in the form of illustrations, paintings, and sculptures.

Instructor: Dr. Kjir Hendrickson
1 session: Tuesday, Dec. 6
10:30 a.m. – noon | Zoom

Despite the fact that the world has changed drastically, human brains have not evolved to any significant degree over the last 50,000 years. In trying to make sense of the challenges & problems associated with the modern world, we are running “new software on 50,000 year-old hardware,” which leads to a variety of problems. Among these, the instincts that helped our ancestors survive — the tendency to assume that if one event followed another, they were connected — are problematic in today’s world. As we make decisions, we are literally battling with our instincts. In this class, we’ll learn about a variety of cognitive biases built into the human brain and address how they negatively impact decision-making.

See the latest evolution of this 400 year old art form and witness the sweat, joy, and frustration of the in-studio rehearsal. Your registration confirmation email has the Zoom links for all of your upcoming OLLI at ASU class(es).

Next to each class title, you will see a link; click on the link to enter the digital classroom. If your class has multiple sessions, you’ll use the same link every week the class meets.

A Zoom account isn’t required to attend a class session.

• If you haven’t used Zoom before, leave about five minutes to set it up before your first use.

• If you are planning on using a laptop or desktop, the first time you click on a link it will download a free and secure program to your computer.

• If you are planning on using a tablet or smartphone, you’ll want to download the free and secure Zoom application from your application store.

What equipment do I need to get started?

Anyone can attend a class session using their laptop or desktop (Windows or Mac), tablet, or smartphone (iPhone or Android).

The following equipment will enhance your experience but is not necessary:

• Web camera: This will increase social connection by allowing people to see each other face-to-face. We love seeing your faces in class! If you do not have access to a web camera, you will still be able to see the instructor.

• Headset with a microphone: This will let you hear and be heard more clearly. Examples include earbuds (wired), over-ear headphones, Bluetooth or wireless headphones.

• Charger: Charging your device during class will ensure that you do not have an unexpected power outage interrupting your learning.

Your gift will help ensure the long-term sustainability of the enriching educational and social programming that touches the lives of our more than 1,000 members (and growing!).

Please consider a gift to OLLI at a level that is comfortable for you. Your support matters and is greatly appreciated. You can **Give Today** by making a donation of any amount, joining our OLLI Giving Society, or supporting our program monthly. You can also **Give for Tomorrow** through your will, trust, or retirement account. Member Code of Conduct

Per ASU Policy Number 5-308: The aim of education is the intellectual, personal, social, and ethical development of the individual. The educational process is ideally conducted in an environment that encourages reasoned discourse, intellectual honesty, openness to constructive change, and respect for the rights of all individuals. Self-discipline and a respect for the rights of others in the university community are necessary for the fulfillment of such goals. The Student Code of Conduct is designed to promote this environment at each of the state universities. OLLI at ASU members are subject to the Student Code of Conduct, established by the Arizona Board of Regents (see students.asu.edu/srr/policies), and the University’s Technology Access Policy (see uto.asu.edu/security-policies/policy).

Maintaining a Positive Learning Experience

Our goal at OLLI is to create classroom environments that maximize the learning and enjoyment for all members. Please be respectful of the opinions of others and be sensitive to the desire for all members to have a voice in classroom discussions. If a member becomes overly disruptive or creates a safety concern, he/she may be removed from the class or activity and potentially banned from future OLLI participation.

Online Classroom Etiquette

Please be mindful of the following considerations when participating in online classes:

- You are encouraged to use your webcam before and after class. During class, you may choose to turn off your camera to improve your internet connection and reduce class disruption.
- Your microphone may be muted when you enter an online classroom, but feel free to unmute your microphone to talk with the instructor or other members before and after class. During class, please keep your microphone muted to prevent background noise and distractions, but you may unmute your microphone to engage in classroom discussion if the instructor invites participation.
- You can use the “chat” function within Zoom to submit comments, questions, or thoughts relevant to the class.
- According to the University Technology Access Policy, “the University limits access to only those individuals and entities that are actively involved in supporting the institution’s mission and goals.” Do not share the class Zoom link or class recordings with individuals who have not enrolled in the class.
